Professional Summary

Full Stack Software Engineer with **4 years** of experience building enterprise web applications using **Node.js, Express.js, React.js, TypeScript, and MySQL**. Experienced in designing secure RESTful APIs, building scalable backend services, developing responsive frontend applications, optimizing SQL queries, and collaborating with cross-functional teams throughout the software development lifecycle. Passionate about writing clean, maintainable code and leveraging AI-assisted development to improve productivity, code quality, and faster feature delivery.

Education

Astral Institute of Technology & Research, Indore

June 2018 – May 2022

Bachelor of Technology (B.Tech) in Computer Science Engineering

Indore, Madhya Pradesh

Experience

Softude by Systematix

Sep 2022 – Present

Software Engineer

Indore, India

Project: Eicher Case Management System

- Developed and enhanced enterprise web applications using **Node.js, Express.js, React.js, TypeScript, and MySQL**, delivering scalable backend services and responsive frontend solutions for business-critical workflows.
- Designed and integrated RESTful APIs for case management, approval workflows, authentication, reporting, and file processing across multiple business modules.
- Built responsive React.js interfaces using React Hooks, Context API, React Router, Material UI, and reusable components.
- Optimized complex MySQL queries and stored procedures, reducing execution time of critical business reports from approximately **5 minutes to 10 seconds** through query optimization, indexing, and stored procedure improvements.
- Collaborated with clients, QA, and cross-functional teams for requirement gathering, production support, and Git-based deployments.
- Leveraged AI-assisted development tools to accelerate debugging, implementation, documentation, code reviews, and overall developer productivity while following engineering best practices.

Project: Drewry Portal

- Developed enterprise web modules using React.js and Node.js, integrating secure RESTful APIs, reusable UI components, and responsive interfaces for business applications.
- Built backend services using Node.js, Express.js, MySQL, and PostgreSQL, integrating secure data management, authentication, reporting, and cross-application data exchange for business workflows.

Project: StepUp – Fitness Tracking Platform

- Developed a full-stack fitness platform with secure RESTful APIs, JWT authentication, reusable React components, and responsive user interfaces using MySQL and MongoDB.
- Designed backend services using Node.js and Express.js while building responsive frontend modules with Next.js, React.js, TypeScript, Redux, React Hooks, and Material UI for API-driven applications.
- Worked with Google Cloud Platform (GCP), Git-based workflows, and AI-assisted development tools during full-stack application development.

Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Frontend: React.js, Next.js, Redux, React Router, Context API, HTML5, CSS3, Material UI, Bootstrap

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication

Databases: MySQL, PostgreSQL, MongoDB

Developer Tools: Git, GitHub, Postman, npm, Webpack, Docker, CI/CD

Cloud: Google Cloud Platform (GCP)

Methodologies: Agile, Scrum, Zoho Projects

AI Tools: ChatGPT, Claude, Cursor, Gemini
